

The Intersection of Art and Science: Using 3D Animation to Explain Biology

Live stream

The Intersection of Art and Science: Using 3D Animation to Explain Biology

Live stream on Tuesday 14 September

- What is biomedical animation?
- What does a biomedical animator do?
- How do you become one?

Join multi award-winning Biomedical Animator Dr Maja Divjak (Peter MacCallum Cancer Centre) as she answers these questions and explains why visualising the world we can't see is more important than ever.

Suitable for

Years 10–12

Subject areas

Science & Technology, Media Arts
