

Draw Chat Habitat

Draw Chat Habitat

Our lives intersect with animals every day. We share our homes with pets, encounter pests and rely on animals as a food producer and food source. What animals have you interacted with today? Artist and farmer Anna Louise Richardson and La Trobe University researchers will guide students through this multi-session workshop. Students will be exposed to the valuable work that La Trobe researchers are doing to protect vulnerable species, support human-animal interactions and secure future food production.

Suitable for

Years 5-8

Subject areas

The Arts, Critical & Creative Thinking
